

Main & Mill's Crushable Watermelon Gose

It's 1975, and you're lounging on the beach at Amity Island, cold beer in hand. The sun smiles down while the sound of surf lapping at the shore lulls you into dreamy relaxation. Suddenly, the mayor strolls by and asks why you aren't in the water.

Duh — you have a delicious watermelon Gose to finish!

Main & Mill Brewing wove real **ripe watermelon and sea salt** into Why Aren't You in the Water Gose (#6 in their Jaws-inspired summer series). Every taste starts crisp and juicy, finishing in a seriously delightful nip of tart fruit.

Amid this multi-layered complexity, the body stays light and crushable throughout. The brew is so drinkable, in fact, you could easily keep ignoring bossy mayors and crack open another can!

Though, if the mayor got a sip of his own, he'd realize there is no reason to force his beachgoers straight into the "jaws" of the sinister shark plaguing your Long Island tourist town. He'd be all, "Stay out of the water, folks. Let's kick back on the sand with this gently puckering quencher!"

It may not actually be 1975, and you might not even live near a beach. But as the soft, tangy waves of Main & Mill's watermelon Gose wash over your palate, the lazy days of summer linger on.
